Projects

Gesproyec Ingeniería e Instalaciones S.L. carries out **projects** for different kinds of **installations, regarding renewable energies, opening permits**
and
minor construction work
. The
engineers
and/or
arquitects
who design those projects are responsible for fulfilling all
valid regulations
and for
advising the client
on all details of the project in question.

Upon request, we additionally take care of **construction management**, making sure that all work is executed correctly and in line with the project design for the respective installation, opening etc.

All services are carried out in a professional, swift and efficient manner.
