Welcome at Gesproyec Ingeniería e Instalaciones, S.L.

Gesproyec Ingeniería e Instalaciones S.L. is a company consisting of a multidisciplinary group of **engineers, architects and licensed technicians**. We work in the **Canary Islands** and our aim is to place all our knowledge at the service of the community. In doing so, we focus on solving problems from the broad field of engineering and installations, as far as repair, maintenance and the construction of new buildings are concerned.

Among the comprehensive range of services, we would like to specifically point out those regarding **projects** and **installations**, such as:

- **High and medium voltage electrical installations.**
- **Plumbing and sanitation (solar hot water heating).**
- **Telecommunications (ICT).**

- **Fire safety.**
- **Air conditioning and forced ventilation.**
- **Domotics.**
- **Renewable energies: wind power, thermal solar energy and photovoltaics.**

Gesproyec Ingeniería e Instalaciones S.L. also handles the administrative processing of projects such as:

- **Opening permits for businesses, industrial premises and car parks.**
- **Permits for minor construction work (private businesses, as well as public spaces).**
- **Garage entrance permits.**

Other services include **health and safety assessments, reports, technical certificates** and **technical consulting**
.

for further information and we'll make you an absolutely free and non-binding offer.

Our Motto:

There are those who make things happen, those who let things happen, and those who wonder what happened.
