

Projects

Gesproyec Ingeniería e Instalaciones S.L. carries out **projects** for different kinds of **installations, regarding renewable energies, opening permits** and **minor construction work**

. The

engineers

and/or

arquitects

who design those projects are responsible for fulfilling all

valid regulations

and for

advising the client

on all details of the project in question.

Upon request, we additionally take care of **construction management**, making sure that all work is executed correctly and in line with the project design for the respective installation, opening etc.

All services are carried out in a professional, swift and efficient manner.
