# Installations and Legalizations

**Gesproyec Ingeniería e Instalaciones S.L.** carries out different kinds of **installations**, such as:

- Electricity and lighting.
- Air conditioning and forced ventilation.
- Plumbing and sanitation.
- Telecommunications.
- Fire safety.
- Domotics.
- Thermal solar energy and photovoltaics.
- Wind power.

Our contractors are duly licensed to install **electrical systems**. During the installation process, they will comply with all **valid regulations** and **carry out the installation as indicated in the project specifications** designed by the responsible engineer or technician. In all cases, licensed electricians will be responsible for carrying out the installations. Finally, to meet all legal requirements, every installation will be duly certified and documented accordingly by means of a technical report. Upon request, we also take care of all **legalisation procedures** that need to be carried out through the **Ministry of Industry**, as well as any **contracts** with respective **suppliers**.

All services are carried out in a coordinated, professional and efficient manner. Most importantly, however, we are able to help our clients save time as far as administrative processes are concerned.
