

## Subsidies and Funding Service

All **natural and legal persons, as well as communities of residents** are strongly interested in finding **financing options** to carry out their **installations, business openings or new projects** as efficiently as possible.

For this reason, **Gesproyec Ingeniería e Instalaciones S.L.** strives to provide the above mentioned persons with access to subsidies granted by public institutions, entities and organizations.

Furthermore, we search for private funding alternatives from our collaborating entities that allow our clients to carry out their desired projects or installations.

Our **experts in funding and subsidies** are responsible for **advising** clients looking for adequate financing options according to the type of project in question. Apart from that, they also take care of all necessary paperwork.

This way we **save our clients valuable time and money**. After our clients have received the desired funding, we advise them on how to fulfil all conditions attached, this way making sure that they maintain their subsidies.

Our **experts in funding and subsidies** have ample experience with the following types of subsidies:

- **Subsidies for the exploitation of wind energy.**
- **Subsidies for the tourism sector (plan renove turístico).**
- **Subsidies for infrastructure and industrial equipment.**
- **Subsidies for supporting industrial health and safety.**
- **Subsidies for the implementation of new technologies in touristic establishments.**
- **Subsidies for highly energy-efficient electric appliances and vehicles powered by alternative energy sources.**
- **ICO credits.**
- **Microcredits.**
- **MASPYME program for small and medium-sized enterprises.**
- **Technology subsidies for enterprises (bono tecnológico).**
- **Etc.**
