

Project Management: Turnkey solutions

At **Gesproyec Ingeniería e Instalaciones S.L.**, we specialise in the elaboration of **turnkey solutions**

We work with professionals in different fields, including **engineers, architects and other licensed experts**

, which allows us to create professional and organized teams that carry out high-quality work at a fixed price in a timely manner, which saves our clients time and money.

Elaborating a turnkey project consists of the following steps:

1. Assessment of project prerequisites in collaboration with client.
2. Compilation of project requirements in collaboration with client.
3. Initial study of project requirements and selection of the most viable solution in line with the client's quality requirements.
4. Elaboration of the technical project.
5. Installation work carried out by duly authorized experts.
6. Commissioning of the installation and delivery to the client.

Our **project managers** are responsible for **organizing, planning and supervising the construction work**, keeping clients informed about our progress at all times.

Gesproyec Ingeniería e Instalaciones S.L. has ample experience with the following turnkey projects:

- **Projects for the opening of businesses, restaurants, bars etc.**
- **Projects for the opening of industrial premises.**
- **Projects for the opening of car parks.**
- **Projects for the opening of offices.**
- **Etc.**
