Engineering Projects and Construction Management for Installations

Our **engineers specializing in installations** know all valid rules and regulations necessary to design the safest and most efficient installations.

Projects or **project specifications** are elaborated by **licensed engineers**, and duly **stamped and validated**
by the corresponding
official engineering association
. Upon request, the responsible engineer also takes care of
construction management
, undertakes all necessary steps to have the project or project specifications
legalised
by the
Ministry of Industry
, and arranges for the coordination of and search for an
accredited inspection authority
, should this be required for the legalisation.

Gesproyec Ingeniería e Instalaciones S.L. has ample experience with the following types of projects:
