

Air Conditioning and Forced Ventilation Systems

Our contractors are duly licensed to install **different types of air conditioning and forced ventilation systems**, and will carry out a detailed study of your business, dwelling or any other site. During the installation process, they will comply with all **valid regulations** and **carry out the installation as indicated in the project specifications** designed by the responsible engineer or technician. Our staff and contractors will at all times comply with relevant regulations on health and safety.

In all cases, **licensed air conditioning and forced ventilation specialists will be responsible for carrying out the installations**. Finally, to meet all legal requirements, every installation will be duly certified and documented accordingly by means of a **technical report**. Upon request, we also take care of all **legalisation procedures** that need to be carried out through the **Ministry of Industry**.

Our **licensed electrical contractors** have ample experience with the following types of air conditioning and ventilation systems:

- Air conditioning for private dwellings.

- Air conditioning and forced ventilation for business premises.
- Air conditioning and forced ventilation for offices.
- Air conditioning and forced ventilation for car parks.
- Air conditioning and forced ventilation for industrial processes.
- Improvement and modernisation of ventilation and air conditioning systems, system failures and maintenance.
- Etc.
