

Plumbing and Sanitary Installations

Our contractors are duly licensed to install **plumbing and sanitary systems**. During the installation process, they will comply with all

valid regulations

and

carry out the installation as indicated in the project specifications

designed by the responsible engineer or technician. Our staff and contractors will at all times comply with relevant regulations on health and safety.

In all cases, **licensed plumbing and sanitary specialists will be responsible for carrying out the installations**. Finally, to meet all legal requirements, every installation will be duly certified and documented accordingly by means of a **technical report** t

. Upon request, we also take care of all

legalisation procedures

that need to be carried out through the

Ministry of Industry

, as well as any

contracts

with respective

suppliers

.

Our **licensed plumbing and sanitation contractors** have ample experience with the following types of plumbing and sanitary systems:

- Connections.
- Plumbing and sanitation for buildings and dwellings.
- Plumbing and sanitation for single family homes.
- Plumbing and sanitation for industrial premises.
- Plumbing and sanitation for businesses.
- Plumbing and sanitation for offices.
- Improvement and modernisation of plumbing and sanitary systems, system failures and maintenance.
- Etc.
